

16x9 | 3/16/26 | Example of screen step recorder

Welcome! In this guide, you'll learn how to
personalize your Mac by changing the
wallpaper.

1

Open System Settings

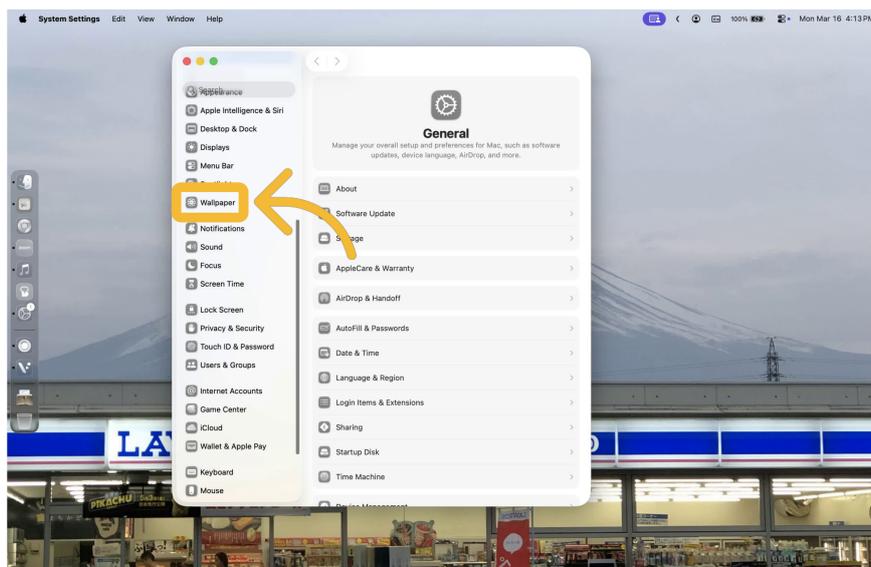

Start by clicking the 'System Settings' icon in your Dock to open the System Settings app and begin customizing your Mac.

2

Select Wallpaper settings

In the System Settings window, find and select 'Wallpaper' from the left sidebar to access your wallpaper customization options.

3

Choose a new desktop wallpaper

Browse through the available wallpapers and click on your favorite image to instantly set it as your new desktop background.
